

THE 12TH INTERNATIONAL CONFERENCE ON COATINGS ON GLASS AND PLASTICS

Advanced coatings for large-area
or high-volume products

JUNE 11-15, 2018

Conference Center Würzburg,
Germany · www.iccg12.de

Closing date for exhibitor applications
and sponsorship orders:

May 18, 2018

The International Conference on Coatings on Glass and Plastics (ICCG) is the largest European scientific conference focusing on highly sophisticated surface technology. An inspiring assembly of scientific and application-oriented keynote lectures, invited and contributed talks target the objective: science meets industry to foster collaborative actions.

In 2018, participants will “Dive into the World of Coatings” and will find this motto reflected on a number of very different levels which all serve to create a most attractive meeting space for scientists, technologists, managers, and practitioners from research, teaching and industry. There is a lot to learn and discuss about latest trends in large-area glass and plastic coatings!

To foster the idea of networking and to offer a platform for future projects, the accompanying exhibition – open for visitors on June 12-14, 2018 – will be turned into a marketplace for innovation. Exhibitors will have the opportunity to meet with participants in individual, pre-arranged B2B meetings and to present their products in mini-workshops and innovation talks. There is time available for in-depth discussions without having to miss out on a talk or skip a presentation.

- up to 300 participants
- up to 50 exhibitors
- up to 45 short courses, lectures and talks

**COME ON BOARD AS AN EXHIBITOR
AND/OR SPONSOR, INCREASE EXPOSURE,
AND BUILD RELATIONSHIPS!**

Organized by
International Organizing Committee of ICCG,
Fraunhofer Institute for Silicate Research ISC
and Vincentz Network
